Career Objective

In the short term, I aim to develop myself as a Fullstack Developer specializing in .NET technologies, enhancing my programming skills and problem-solving abilities. In the future, I aspire to become a Software Engineer focusing on the .NET ecosystem, building high-performance systems and contributing meaningful value to the business.

Work Experiences

SOFTWARE DEVELOPER INTERN 02/2025 - 05/2025

DIGITAL COMPETENCE EDUCATION COMPANY LIMITED

- Contributed to planning and developing a landing page website (ASP.NET, WordPress) for course promotion, resulting in an online class of 10 students.
- Collaborated within Agile (Scrum) workflows, ensuring project progress and quality through effective teamwork.
- Developed strong teamwork and transparent communication skills during group tasks and reporting

Projects

Developer 02/2025 - 05/2025

WEB-BASED PLATFORM FOR SCHOOL EQUIPMENT MANAGEMENT

Project Description: Developed a web-based system for managing school equipment, allowing users to track device status, schedule maintenance based on wear and tear over time, and automatically generate maintenance plans by condition. The system also supports creating repair/maintenance/incident tickets and managing user access permissions.

Technologies: ASP.NET MVC/Core (C#/.NET), Telerik UI, SQL Server

Source Code: *https://github.com/devnguyen1910/assets-management*

Developer 10/2024 - 01/2025

WEB-BASED E-COMMERCE PLATFORM

Project Description: Developed an e-commerce website with core functionalities such as product management, customer management, online payment, order and delivery management. The system supports creating invoices, managing product stock levels, applying promotions/discount codes, and generating reports on revenue, best-selling products, and inventory.

Technologies: ASP.NET MVC (C#/.NET), Bootstrap 5+, SQL Server, Azure

Source Code: *https://github.com/devnguyen1910/ecommerce-site*

Developer 02/2024 - 04/2024

DESKTOP APPLICATION FOR FURNITURE MANAGEMENT

Project Description: Developed a desktop application for managing furniture sales and inventory, supporting product, customer, and material information management. The system allows users to create and manage sales orders, print invoices, track inventory levels, manage user access roles, and generate reports on sales, stock levels, and material usage.

Technologies: WinForms (C#/.NET), DevExpress, SQL Server
